CAPABILITY MAP

CORE EXPERTISE

Core competencies and selected technology domains

Keahlian dirangkum sebagai area kontribusi dan orientasi desain berdasarkan portofolio serta proyek yang telah dibahas. Daftar ini bukan klaim sertifikasi atau penguasaan setiap vendor/produk tertentu.

Cybersecurity & Cyber Defense

Security strategy, SIEM/SOC concepts, threat intelligence, incident response, digital forensics, and cyber command architecture.

System & Solution Architecture

System decomposition, modular architecture, service boundaries, integration patterns, data flows, and operational design.

Network Visibility & NDR

Traffic visibility, TAP/SPAN, packet broker, network detection, sensor deployment, buffering, and central visibility.

AI, Automation & Intelligence

AI-assisted analysis, workflow automation, intelligence aggregation, decision support, and human-in-the-loop systems.

Data Platforms & Analytics

Data collection, normalization, dashboards, operational analytics, reporting, and multi-source integration.

Product Innovation & Management

Problem framing, product concept, requirements, capability roadmap, prototyping, and implementation oversight.

Digital Transformation & e-Government

Public-sector workflows, cross-agency data coordination, service integration, and operational platforms.

Strategic Planning & Governance

Technology roadmap, prioritization, architecture governance, risk management, auditability, and delivery accountability.

SELECTED DOMAIN EXPOSURE

- National cyber defense and public-sector security systems.
- Environmental monitoring and disaster-response coordination.
- Public-health data platforms and crisis-response systems.
- Digital payment ecosystems, merchant aggregation, and RegTech concepts.

• Operational dashboards, ticketing, analytics, and real-time collaboration.

HOW TO READ THIS CAPABILITY MAP

Area keahlian di atas menggambarkan spektrum desain, strategi, dan pengembangan solusi. Kedalaman hands-on, skala implementasi, peran formal, dan hasil kuantitatif sebaiknya dilengkapi per proyek agar profil ini dapat diuji secara objektif.
